13. DISPOSAL CONSIDERATIONS

Disposal Methods: Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber. Observe all federal, state and local environmental regulations.
<table>
<thead>
<tr>
<th>STOT-single Exposure</th>
</tr>
</thead>
<tbody>
<tr>
<td>caution exercised when administered to a nursing woman.</td>
</tr>
<tr>
<td>Systemic absorption of this product may result in toxic effects on the CNS and the cardiovascular system.</td>
</tr>
<tr>
<td>Adverse effects could be more pronounced in those individuals with pre-existing diseases of central nervous system or cardiovascular system or those receiving medications that affect these systems (such as antihypertensive agents, antiarrhythmic agents or CNS depressant medications). Effects could also be more pronounced in individuals with a compromised ability to metabolize and clear active ingredients from the blood and body tissues (such as severe liver or kidney disease).</td>
</tr>
<tr>
<td>Prilocaine may cause methemoglobinemia in high doses and so may aggravate congenital or idiopathic methemoglobinemia.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>STOT-repeated Exposure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chronic effects are unlikely to occur. Repeated exposure to high levels of an amide anesthetic in animals produced adverse effects on the liver and CNS.</td>
</tr>
<tr>
<td>Prilocaine may cause methemoglobinemia in high doses and so may aggravate congenital or idiopathic methemoglobinemia.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Aspiration Hazard</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aspiration hazard is low. May cause tingling/numbness in exposed areas (paresthesia). Intratracheal (rabbit) LD50 for prilocaine is 65 mg/kg</td>
</tr>
</tbody>
</table>

MATERIAL SAFETY DATA SHEET
ORAQIX®

Created on: 11 July 2013
Replaces version dated: 06 October 2010

---

**Reproductive Toxicity:**

Prilocaine: Reproduction studies have been performed in rats at doses up to 30 times the human dose and revealed no evidence of impaired fertility or harm to the fetus.

Lidocaine: No teratogenic effects were noted in embryo-fetal development studies in which rats or rabbits were treated during the period of organogenesis. Embryotoxicity was seen in rabbits, at maternally toxic doses. In rats, decreased pup survival was seen for dams treated during late pregnancy and lactation, at a dose that was maternally toxic and affected the duration of gestation.

Lidocaine and prilocaine: No effects on embryo-fetal development were seen in a study in which lidocaine and prilocaine were given in combination, during organogenesis.

There are, however, no adequate and well-controlled studies in pregnant women. Animal reproduction studies are not always predictive of human response. General consideration should be given to this fact before administering prilocaine to women of childbearing potential, especially during early pregnancy when maximum organogenesis takes place.

Lidocaine, and in all probability, prilocaine are excreted in breast milk in small amounts. However it is unlikely that effects will be seen in the child following treatment with Oraqix. Thus breastfeeding can be continued following treatment, with

</tbody>
</table>

O-toluidine (0.5 mg/mL), a metabolite of prilocaine, showed positive results in Escherichia coli DNA repair and phage-induction assays. Urine concentrates from rats treated with o-toluidine (300 mg/kg, orally) were mutagenic for Salmonella typhimurium with metabolic activation. Several other tests, including reverse mutations in five different Salmonella typhimurium strains with or without metabolic activation and single strand breaks in DNA of V79 Chinese hamster cells, were negative.

Genotoxicity tests with lidocaine were negative. However, whilst Ames genotoxicity tests with 2,6-xylidine were negative a chromosome aberration test in CHO cells indicated an in vitro genotoxic potential of this metabolite of lidocaine.

Carcinogenicity: Studies of prilocaine or lidocaine in animals to evaluate the carcinogenic potential have not been conducted.

Chronic oral toxicity studies of o-toluidine, a metabolite of prilocaine, in mice (150–4800 mg/kg) and rats (150–800 mg/kg) have shown that...

</table>
### 7. HANDLING AND STORAGE

<table>
<thead>
<tr>
<th>Handling:</th>
<th>No special precautions are necessary when handling packed product. In case of release, avoid contact with skin and eyes. Do not breathe mist.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Storage:</td>
<td>Protect from light. Store in original containers and packaging as recommended by manufacturer. Keep containers securely sealed and cool. Store below 25°C. Check that containers are clearly labelled.</td>
</tr>
</tbody>
</table>

### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

<table>
<thead>
<tr>
<th>Exposure Control Limits:</th>
<th>No exposure limits assigned for product. Prilocaine hydrochloride - 5 mg/m³ COM, REL TWA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Special Protective Measures:</td>
<td>Wear suitable protective clothing</td>
</tr>
<tr>
<td>Eye:</td>
<td>Chemical goggles or face shield.</td>
</tr>
<tr>
<td>Hands/feet:</td>
<td>Wear chemical protective gloves, e.g. PVC.</td>
</tr>
<tr>
<td>Other:</td>
<td>Laboratory coat and P.V.C. apron.</td>
</tr>
<tr>
<td>Engineering controls:</td>
<td>Use in a well-ventilated area. General exhaust is adequate under normal operating conditions. Local exhaust ventilation may be required in specific circumstances. If needed, use a NIOSH approved respirator for vapors, dusts and mists with TLV greater than 0.05 mg/m³.</td>
</tr>
<tr>
<td>Respiratory Protection:</td>
<td>Material does not require special ventilators, respirators, etc.</td>
</tr>
<tr>
<td>Work Hygienic Practices:</td>
<td>Avoid ingestion &amp; contact with eyes. Remove / launder contaminated clothing &amp; shoes before reuse. Wash hands after use.</td>
</tr>
<tr>
<td>Supplemental Health &amp; Safety Information:</td>
<td>Irritating to the eye. Contact may also cause numbness and loss of sensation.</td>
</tr>
</tbody>
</table>
4. FIRST AID MEASURES

<table>
<thead>
<tr>
<th>Eye Contact:</th>
<th>Flush immediately with eye wash solution or clean water, holding the eyelids apart, for at least 15 minutes. Obtain medical attention.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Skin Contact:</td>
<td>Remove contaminated clothing. Wash skin with soap and water. If symptoms (irritation or blistering) occur obtain medical attention</td>
</tr>
<tr>
<td>Inhalation:</td>
<td>Remove patient from exposure. Obtain medical attention if ill effects occur. May cause tingling/numbness in exposed areas (paresthesia). High atmospheric concentrations may lead to anaesthetic effects.</td>
</tr>
<tr>
<td>Ingestion:</td>
<td>Do not induce vomiting. Rinse mouth with water and give 200-300 ml of water to drink (8-10 ounces). Never give anything by mouth if unconscious. Obtain medical attention. May produce numbness of the tongue and anesthetic effects on the stomach. Ingestion of 5 to 25 mL of 2% viscous Xylocaine (lidocaine) has resulted in seizures in children.</td>
</tr>
</tbody>
</table>

5. FIRE FIGHTING MEASURES

<table>
<thead>
<tr>
<th>Suitable Extinguishing Media:</th>
<th>Use appropriate agent for involved fire (i.e., water spray, carbon dioxide, dry chemical powder or appropriate foam).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specific Hazards Arising from the Chemical(s):</td>
<td>If involved in a fire, it may burn and emit noxious and toxic fumes.</td>
</tr>
<tr>
<td>Protection of Fire-fighters:</td>
<td>A self contained breathing apparatus and suitable protective clothing should be worn in fire conditions.</td>
</tr>
</tbody>
</table>

6. ACCIDENTAL RELEASE MEASURES

| Personal Precautions: | Ensure suitable personal protection during removal of spillages. Take care to avoid needles and broken containers. Clean spills with normal procedures used for non-hazardous liquids. |
| Environmental Precautions: | Transfer spilled vials to a suitable container for disposal. Sweep/soak up, place in a bag and hold for waste disposal. |
| Containment and Clean up: | Clear up spillages. Wash the spillage area with water. Transfer spilled vials to a suitable container for disposal. Ventilate area and wash spill site after material pickup is complete. |
1. IDENTIFICATION (MATERIAL AND MANUFACTURER)

Product Name: Oraqix®
Synonym(s): Lidocaine and Prilocaine periodontal gel
Product Use: Indicated for adults who require localized anesthesia in periodontal pockets during scaling and/or root planing.
